

TRAINING

- Expert Training in the Latest Technologies
- Industry-Demanded Certifications

PCB TECHNOLOGY

Quality & Inspection

- IPC-A-610 Instructor & Operator Certification

Soldering & Assembly

- IPC J-STD-001 Instructor & Operator Certification

Bare Board Inspection

- IPC-A-600 Instructor & Operator Certification
- IPC-6012 Instructor & Operator Certification

Rework & Repair

- IPC-7711 & IPC-7721 Instructor & Operator Certification

Hand Soldering Skills

- Soldering Basics, Wires & Terminals, Lap Solder Joints, Through-Hole and Surface Mount Training

PCB Fundamentals

- Component Identification
- Electrostatic Discharge

PCB Design

- Essentials of PCB Design
- IPC Designer Certification

COUNTERFEIT COMPONENTS

IDEA-STD-1010

- Seminars & Workshops
- IDEA-STD-1010 Essentials
- SAE AS5553 Counterfeit Electronics

CABLE & WIRE HARNESS TECHNOLOGY

Quality & Inspection

- IPC-A-620 Instructor & Operator Certification

Hands-On Labs

- Crimping & Harness Assembly Training

TECHNICAL SUPPORT

- Manufacturing Start-Up
- Process Evaluation
- Subcontractor Qualification
- Equipment Evaluation
- Lead-Free, ESD, Process and Quality Audits

IPC-6012 CERTIFIED STANDARDS EXPERT (CSE)

IPC-6012

COURSE DESCRIPTION

If you are looking at becoming a subject matter expert in IPC-6012 "Qualification and Performance Specification for Rigid Printed Boards" without the need to provide any IPC Certification to others, then this is the program for you. As a CSE-Certified Standard's Expert, you have the opportunity to support your organization as a key subject expert on the IPC-6012, interfacing with a variety of functions within your firm and providing critical interpretation support of the standards, without the requirements carried under previous IPC Instructor Certifications.

This 4-day, lectured course is a comprehensive program that defines qualifications, performance requirements, requirements for design, fabrication and inspection of rigid printed boards. Based heavily on IPC-6012 with supporting documentation from IPC-A-600 "The Acceptability of Printed Boards", this class is a great asset for designers, manufacturing and quality engineers, purchasing agents, managers and supervisors, fabricators, board shop auditors and anyone recommending, inspecting, or specifying printed circuit boards.

Obtain a CSE Certification in one standard and, if you choose, add additional certifications in IPC-A-610, J-STD-001, IPC/WHMA-A-620, IPC-A-600, or IPC-7711/7721. With three (3) CSE certifications, apply with the IPC to become a Senior Certified Standard's Expert.

WHO SHOULD BECOME CERTIFIED

This is an advanced course designed for individuals who are required to act as a subject matter expert for this standard but DO NOT need to conduct training.

PREREQUISITES

- Understanding of the English language, oral and written
- To qualify to take any CSE standard exam, each attendee must:
 - Complete and Pass IPC's on-line Enhanced Policies and Procedures Exam, on your own outside of class
- To obtain CSE Certification, candidates must successfully pass:
 - General Knowledge Exam, on-line, closed book, in class
 - Standard Endorsement Exam, on-line, open book, in class.

CLASS SIZE

Maximum number of students is limited to ten (10) to provide greater instructor interaction. Call early to reserve your space.

COURSE OUTLINE

Day 1

- Introduction and IPC Training
- Scope/Applicable Documents
- General and Material Requirements
- Visual Requirements

Day 2

- Visual Requirements (continued)
- Dimensional and Conductor Requirements
- Structural Integrity
- Solder Mask, Electrical, Cleanliness, Rework and Repair

Day 3

- Special Requirements
- Quality Assurance Provisions and Notes
- Questions and Review

Day 4

- Course Summary/Review
- Open & Closed Book Exams

eTRAINING On-line training is available for some courses. Please inquire.

ON-SITE TRAINING Please call a training consultant and ask about customized course content, on-site training and training around your production schedules.
